Dear Travis and the *whole Recreation Unlimited Team*,

We just can't THANK YOU enough for building us the most incredible playground for the children of The Play School at Legacy! You were absolutely the best, most professional vendor we have ever worked with. Your planning and building process was thorough, and your level of communication made the whole project run smoothly. When we were choosing a playground vendor, one of the main reasons we chose Recreation Unlimited was because you were so eager to help us and so passionate about designing play equipment! You spent significant time learning our business and listening to our needs. It was clear from the start that you knew all the age and equipment laws and regulations, and you helped us meet the stringent child care licensing rules in our industry. We had so much fun taking our school's aquatic theme and extending it to our outdoor playground and building a creative, eye catching, fun and safe play space! We absolutely love our new playground! Thanks to you & your team, we have a unique playground that sets us apart from our competition and takes our business to the next level. We really want to thank you and recognize you, Travis, for how great it was to work with you both as our sales representative and our designer. Recreation Unlimited deserves to be acknowledged for having a great company, a great team and a great product! We look forward to the next opportunity to work together to build another Play School playground!

Sincerely,

Rita Hafner, Katie Guerra and Amanda McKeon
